AMTEL WEB DESIGN &
GRAPHICS TECHNOLOGY

OUR HISTORY

2013 - 2014 The company started from an idea conceived out of a conversation with a friend when the founder was issued a Joomla CMS (Content Management System) tutorial video, and told he could become a web designer if he listened and practiced what was therein. Almost immediately the learning started, visualization for having a web design company became an open discussion. Subsequently as the learning progressed, the term '**AMTEL**' was formed. The letters **'AM**' as abbreviations of the first letters of the founder's first and last name whereas the '**TEL**', was telecommunication abbreviated.

Also, within this time frame, the founder was in an active and intense learning state, taking up web design and development jobs from indigenous companies to improve skills and practical experience. Business registration was done within same period.

2014 - Date The company has been growing at a rapid pace, adding more in to her scope of operations, moving towards the attainment of the vision and mission statements as originally planned.

MODE OF OPERATION

Coverage: Our specialization is on web, desktop and mobile applications using the latest technologies in the industry to deliver in a timely fashion.

Scope: By focusing on quality and standard, we rely on self selling businesses and systems, as such give no room for excuses whatsoever.

Mode: The bedrock of our success lies within trying to:

1. Know and measure exactly what our clients / Customers want
2. Evaluate and analyze the problem before us
3. Work with tight budgets
4. Provide insight and offer profitable and solution based suggestions
5. Work hand in hand with our customers through development stages

Finance: Amtel web has never borrowed, or taken loan from any cooperation or financial institution for her operations. The company operates solely on the income / profits generated by it for the execution of it's projects.

Office: We have a serene and conducive working environment enjoyed by both staff and customers

SECURITY

At Amtel, we take security seriously and as such, more serious than anything, it is our priority that security measures are put in place in order to ensure that our client's products, brands, and software are safe and protected against online threats like Malware and other malicious attacks.

Physical security measures include:

1. SSL (Secure Socket Layer)
2. Periodic Backups
3. CXX (Cross Site Scripting)
4. Sitelock and Periodic Scanners
5. Hashing Algorithms
6. Tokenization
7. Access Controls etc
